- » Bad Salzuflen, DE
- » Shanghai, CN
- » Suzhou, CN
- » Florida, USA

Employees:

» 25

Who we are

- › Future-proof automation solutions
- › 25+ years experience in industrial automation
- › Combining IT + OT - from virtualisation to Functional Safety
- › Innovation-driven to meet evolving industry demands
- › Strong focus on customer satisfaction and partnership
- › Functional Safety expertise

Know-how & Competences

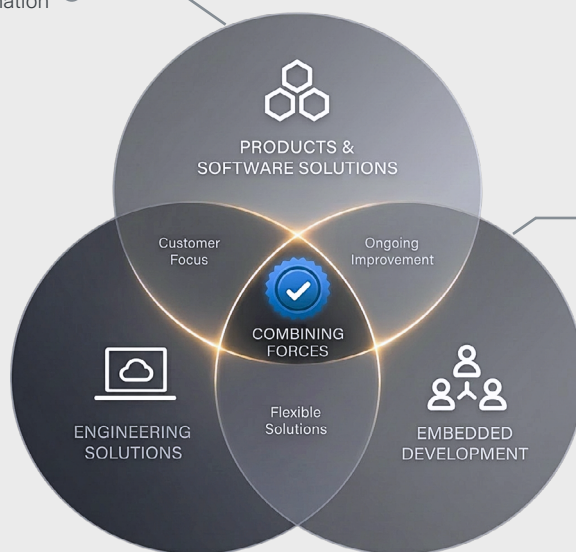

- › Control Technologies
- › System Level Software Design
- › IT/OT Communication
- › Electrical Design
- › Functional Safety (Design & Certifications)

#togetherWOW

What we provide

Integral to functional safety and industrial automation

Platform-independent
Safe
Secure

Functional
Safety

One-stop solution:
from planning
to service

Product Portfolio:

- › Industrial Controllers
- › EtherCAT I/O Modules
- › IPCs and Edge IPCs
- › Ethernet Switches
 - › Panel PCs
 - › Safety Modules
 - › Relays
- › Power Supplies

SALZ Automation GmbH

Max-Planck-Str. 64
32107 Bad Salzuflen

Our Products

- › Certified product solutions meet the highest safety and quality standards

Our Engineering Services

- › From concept to finished solution - engineering for modern automation

Planning & Design

- › Smart circuit diagrams with EPLAN & Co.
- › Precise technical drawings and layouts
- › Efficient electrical design
- › Optimised energy calculations
- › Clearly structured component and parts lists

Programming & Safety

- › PLC programming with Codesys, Siemens & others
- › Development and optimisation of visualisation systems
- › Integration of Functional Safety into your automation systems
- › Set-up of networks and interfaces
- › Documentation and validation

Installation

- › Seamless integration into your production environment
- › Professional cabling, labeling and connectivity
- › Installation and customisation of cable routes on site

Commissioning

- › On-site commissioning of your automation system
- › Conducting tests such as FAT and SAT
- › Preparation of customised test reports

Cabinet Building

- › Assembly and wiring of control cabinets
- › On-site modification and adaptation of existing systems
- › Standards-compliant inspection and testing
- › Industrial cable assembly
- › Parameterisation and configuration of components
- › Customised, scalable control cabinet solutions for growing system requirements

Mechanical modifications

- › Manufacturing and adaptation of mechanical components
- › Implementation of protective measures
- › Adjustment of mechanical drawings
